**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Schneider (6,220,477).

3. Schneider discloses a handle for use with cookware (Figures 8-12) with an attachment member (138), the handle (135) pivotably mounted about a horizontal axis (142) and the handle moves between a lifting position transverse to the cookware and a stored position approximately parallel to the wall of the cookware. The handle has a catch including a detent (155) with an elastic member (195) engaging the mount through recesses in the handle and the mount, and the handle is released through pressure applied to the handle at pressure points (179).

4. Claims 4-6 and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kolell (2,572,629).

5. Regarding claims 4 and 9, Kolell discloses a container capable of being used as cookware (Figures 1-3) with a lid (2) and a base (1) having a handle (5) pivotably mounted to attachment members (3') about a horizontal axis and moveable between a lifting position with the handle in a vertical orientation and transverse to the container and a storage position (Figure 1) where the handle is parallel to the wall of the container.

6. Regarding claims 5, 6, 10 and 11, Kolell discloses an eccentric cam (7) on the handle to lift the lid when the handle is in a storage position (Figure 1, column 2, lines 16-18 and lines 30-34).

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 9, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schneider in view of Cheng (6,419,107).

9. Schneider discloses cookware (Figures 8-12) with an attachment member (138), a handle (135) pivotably mounted about a horizontal axis (142) and the handle moves between a lifting position transverse to the cookware and a stored position approximately parallel to the wall of the cookware. The handle has a catch including a detent (155) with an elastic member (195) engaging the mount through recesses in the handle and the mount, and the handle is released through pressure applied to the handle at pressure points (179). Schneider does not teach the use of a lid with the cookware base. Cheng discloses cookware with a lid (2) for containing the heat and the contents in the cookware. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have incorporated the use of a lid as disclosed by Cheng in the cookware disclosed by Schneider to provide a means for containing the heat and the contents in the cookware.

**Conclusion**

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wentorf (1,698,929) and Munari (6,079,590) disclose cookware with pivotable handles.
